 Qualified Data Engineers Full Project Management Scheduled Work Report and Photos

1 Site Inspection is carried out and a full scope of work is developed working closely with the client to understand the project in detail and the outcomes required.

2 Recommendations are given to fulfil all the project requirements and how the project can be future proofed

3 Installation of the project is worked around existing trading hours so that the working environment can be kept with minimal disruption, including working after hours. All aspects of the Installation is photographed and reported on.

4 Fluke Testing and Guarantees are given to all our work and the reports are handed over with a detailed project overview. All new installed cables come with a 25 year Guarantee.
